AquaNaut® 200 & 400 SUCTION CLEANER

Clean and maneuver any
pool surface with ease.

Experience a reliable clean with AquaNaut 200 & 400 (2- and 4-wheel drive respectively) suction pool cleaners from Hayward®. Their patented self-adjusting turbine vanes maximize power at any flow and allow for effortless passage of large debris. Multiple pre-programmed internal steering sequences ensure cleaner covers both deep and shallow ends equally—including walls—never missing an inch. No matter the pool surface, AquaNaut 200 & 400 maneuver with patented robust tires and adjustable skirts that maintain optimal suction, even when encountering obstacles. Service and maintenance is simple, and better still, you'll rest assured knowing that AquaNaut 200 & 400's durable, robust design is backed by Hayward's network of reliable service centers.

Robust design built for a reliable clean.

New AquaNaut® 200 & 400 suction cleaners from Hayward® are designed to deliver a thorough clean for pools of all shapes, sizes, flow rates and debris levels.*

Features and benefits:

- Patented self-adjusting turbine vanes ensure maximum power at any flow—their ability to move allows easy passage of large debris to ensure full cleaning with peace of mind.
- Multiple pre-programmed internal steering sequences ensure cleaner covers both deep and shallow ends.
- Patented robust tire treads give AquaNaut enhanced climbing ability and obstacle maneuverability, especially main drains.
- Patented adjustable roller skirt allows cleaner to maintain optimal suction on uneven surfaces and when encountering obstacles.
- Easy to service and maintain, backed by Hayward's network of trusted service centers.
- Three interchangeable throats allow optimization of suction performance at lower flow and larger debris passage. As such, AquaNaut is the ideal suction cleaner for use with variable-speed pumps.

2-Wheel Drive Suction Cleaner

4-Wheel Drive Suction Cleaner

Small throat
For better suction with lower flow rate and smaller pump, can be used with variable-speed pump at lower speeds.

Medium throat (default throat)
For almost all average pool filtration systems and installations.

Large throat
Optimizes suction and water flow with higher flow rate and larger pump, can be used with variable-speed pump at higher speeds.

Choose from two models:

Choose from two models:		
AquaNaut 200	2-Wheel Drive Suction Cleaner	PHS21CST
AquaNaut 400	4-Wheel Drive Suction Cleaner	PHS41CST

Feature	AquaNaut 200	AquaNaut 400
Hose Length	33'	40'
Pool Size	Up to 16' x 32'	Up to 20' x 40'
Pool Surface	Concrete, Gunite, Vinyl, Fiberglass,* Tile,* Pebble	Concrete, Gunite, Vinyl, Fiberglass,* Tile,* Pebble
Minimum Pump Size	1/2 HP or 35 gpm	1/2 HP or 35 gpm
Drive Sequence	Turn every 8' to 10'	Turn every 11' to 14'

*Optional tape tires may be required for smoother surfaces
